Subject: RE: 141

D Line 30 on page 2 - I think the LEMSA's should definitely integrate gurney and wheelchair vans into their plans. Many are operating as ambulances by assisting patients more than they should and administering oxygen. No one is regulating them now and if they operate as an ambulance then the LEMSA's should have power to control them somehow.

B3 lines 36 and 37 on page 12 - Can the LEMSA override the rule that an EMT-P with expanded scope of practice be able to be used in a CCT capacity? Our county right now will not allow this type of service.

C.1.b.6. line 40 on page 13 - LEMSA is spelled wrong!

I think these rules are great and hopefully will be enforceable somehow.
