

EMERGENCY MEDICAL TECHNICIAN PREPARATION

Two of the most difficult topic areas in our Emergency Medical Technician program are the Medical Terminology and the Basic Science. In response to our students needs, an Emergency Medical Technician Preparation program was developed for students who may benefit from additional assistance in these areas and/or those who would like to be introduced to our methods of instruction. This program is designed to introduce students to some of the more difficult learning topics, prior to encountering these lectures in our Emergency Medical Technician program.

"I feel I have a heavy advantage over everyone else who hadn't taken the prep course, it is amazing how much they can teach in two days."

Course covers:

- **Anatomy and Surface Anatomy**
- **Physiology**
- **Cardiology**
- **Pulmonary**
- **Neurology**
- **Medical Terminology—(For Basic EMT's)**

All topics are covered comprehensively. Twice the time spent on topics compared to the actual EMT program. In addition, an exam will be administered at the end of the program to identify weak areas, as well studying strategies.

This course is approved for **16** hours of **CEUs** of Instructor lead credit for current EMTs.

Upcoming 2013 Courses:

- July 21
- Sept 15

plus on-line sessions

Fee: \$ 150.00

Course objectives available upon request.

To register or for more information visit us at
www.cpc.mednet.ucla.edu
