

EMS is maturing.

Like a good wine, field care gets better with time. More has become known in the past decade than in the previous thirty years combined. This educational symposium will bring you up to date on some of the current developments in EMS care.

Nationally known subject matter experts will provide critical information about key topics in field care medicine.

Exhibitors will be on hand to demonstrate new and emerging technologies associated with the presentations.

Sponsors

The SRJC EMC program would like to acknowledge and thank the following organizations for their sponsorship:

Sonoma Life Support - AMR
